

Mark Makers

Ages 3.5 - 5 (Preschool/ECE)

Mark Makers is a choice-based program designed for our youngest artists. Preschoolers explore novel creative experiences, develop essential fine motor skills, and encounter masterpieces by artists such as Miró and Kandinsky through expert-guided open-ended play. By focusing on the joyful physical process of creation rather than cookie-cutter templates, we build the creative confidence and critical thinking skills that form the foundation for lifelong learning.

"Art is a place for children to learn to trust their own ideas."

— Mary Ann F. Kohl

Mindfully Fostering Foundational Milestones

Fine motor skills, language development, bilateral coordination, creative problem-solving, community and spatial awareness, cognitive flexibility, identity through creative autonomy, and self-regulation.

A Note for Caregivers

The value of art education lies entirely in the thinking, experimenting, and problem-solving that happen while making, especially for our early learners. When art is truly choice-based, your child's work will look beautifully unique. Sometimes, your grown-up eyes may not be able to make heads or tails of your little one's creation. Celebrate this! They didn't just make a physical object; they engineered a solution, tested the limits of a material, and expressed an authentic piece of themselves.

Always remember to Dress for Mess! Our studio is a hands-on, high-exploration environment.
